

By clicking upon this tab the customer will be able to set targets for a number of parameters such as driving time, time at customers and other location groups.

Actual percentages of the relevant information are shown directly against the targets allowing the customer to have an instant management tool to observe the movement or activity of their fleet.

## 1. Getting Started

Go to [www.masternaut.co.uk](http://www.masternaut.co.uk)

Enter your allocated username, password and press 'Go'.

## 2. Online Journey Report – Daily View

Select 'Performance'.

**Location / Driving**    **Target**

M Office	5	%
Home	10	%
M Prospects	40	%
M Customer	20	%
Others	25	%

Driving	5	%
M Prospects	10	%
M Customer	40	%
M Customer	20	%
Other	25	%

**Save**

Select 'Location/Driving' from the drop down fields. This can either be time spent driving or at each location group.

Enter 'Target' as a percentage – this is the amount of working time that should be spent at this location group.

Select 'Save'.

## Quick Start Guide

Start Stop Print ?

< July 2008 > < July 2008 >

Mon	Tue	Wed	Thu	Fri	Sat	Sun
30	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31	1	2	3
4	5	6	7	8	9	10

Actual Target

Driver -- All --

Result View

Then select the 'Start Date' and 'End Date'

the system will then search between these dates for visits to your selected location.

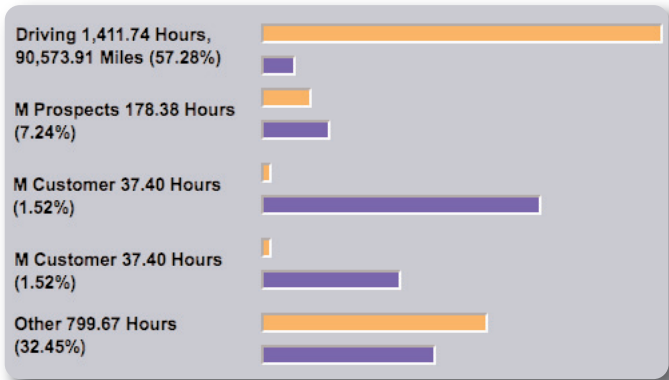

To select a date simply click on the correct day.

If you would like to view previous months select <.

Select > to scroll forward (months).

The entire fleet can be viewed by selecting the user from the drop down field or individual driver/vehicle performance can be measured by selecting 'All'

When all the data has been entered select 'View' to see results.

When 'View' is selected the user will be shown an actual vs target graphical representation of operations.

Each location group is represented, showing:

- ❖ Total time spent on this activity (for location groups only)
- ❖ Total Mileage Driven (for driving only)
- ❖ Percentage of time at location group)

Targets are represented by

Actual time is represented by
