

Live PTO Updates

If a vehicle is fitted with a PTO (Power Take Off) switch and this switch is linked in with the Masternaut system, users can now see where the PTO has been switched on and off on the Map.

This is available both on live and historical mapping.

Each activity is represented on the map by a 'Cog' icon as follows: 

When PTO activity is shown on the map, the user may hover a mouse over the Cog () to get the information on whether the PTO is on or off and what time the activation was made.

There are two ways to view this information. A user can either select the map from the locator screen:

Or by selecting the relevant vehicle/driver and date in the Payroll or Vehicle tab and then viewing the map.

Vehicle	Start Day	Finish Day	Shift Time	Total Driving	Total Idling	Total Stopped	Total Working	No. of Stop	Total Miles	Max. Speed
B1 OGW	11:07:00	13:31:34	02:24:34	00:14:43	00:00:00	02:09:51	N/A	6	5.5	48
